Does this sound like you?

You're passionate about the industry and have been dreaming about getting into aesthetics but without a lucky break, it seems absolutely impossible

You've spent thousands of dollars on trainings, watched hours and hours of videos but it definitely hasn't given you the confidence you need, and no one will hire you.

You have applied to countless jobs, and you know that if anyone would give you a chance you would be a fast learner, but each application is met with rejection. They all want at least 2 years work experience.

You accepted a low paying position as an aesthetic laser tech with the promise that they would train you if you put your time in. But with each passing week you feel your hopes fading as the promise of training and moving up in your career just never seems to be fulfilled.

You're feeling stuck or frustrated. You've invested so much in your education and career and yet you still haven't been able to achieve your goal of being an accomplished and successful aesthetic injector.

You are watching other medical professionals be successful in their aesthetic dreams and it's left you wondering how they did it and why you can't.

Do you feel like there is an **invisible ceiling** on your career?

Are you secretly terrified that this
is like breaking into show
business or winning the lottery
and you might never be able to
advance above this ceiling?

Once You Take Them

- ✓ You will have a complete control over the direction of your career. Who you serve as your patients, how you serve them, and what income you can command
- ✓ You will know how to establish yourself as an expert and trusted authority in aesthetics
- ✓ You will realize that this invisible ceiling was never even there in the first place. And you will start your 6 figure + career in aesthetics almost immediately
- ✓ You will carry yourself with a new confidence. Your friends and colleagues will notice how happy you are, and they will beg to know how you did it and how they can achieve similar results.
- ✓ You will be filled with joy, elation and even a feeling of being unstoppable in your life and career. You will get back to the satisfaction you had when you first started in your profession.

A woman with blonde hair, wearing a blue dress, stands on the left side of the frame, gesturing towards a group of people. The group consists of six individuals (three women and three men) standing and one woman sitting on a white bench. They are in a modern interior with a large circular chandelier and a wall with the word 'BEAUTIFUL' in large letters. The text 'Step #1' and 'Take A Moral Stand' is overlaid in white.

Step #1 Take A Moral Stand

Extreme Ownership

- ✓ This is the preeminent, crucial first shift, that has to happen for success
- ✓ You and only you are ultimately responsible for reaching your goals, your successes and your failures
- ✓ It's simple but its never easy. It's not supposed to be easy. If it was easy, everyone would be doing it.
- ✓ Extreme ownership allows for extreme success

Step #2 Commit To Mastery

**There are only 2 reasons why
you haven't committed to
mastering aesthetics**

1

You don't truly believe
your experience of
attaining the goal will
be worth the effort.

2

You don't believe it's an
attainable goal.

Step #3

Mentorship & Hands-on Practice

You can have all the best didactics, book and video training in the world, but without the repitious physical experience with mentorship, you will not gain **mastery**.

Here is how you make the other 3 steps work exponentially faster.

We know that successful people take
extreme ownership

We know that successful people utilize
self-discipline to commit to mastery

We know that mentorship and hands on
practice are without a doubt necessary
ingredients for confidence

And now we leverage time in the right
way, with hands on experience, and have
the ability and confidence necessary to
attain that 6 Figure Income in the
aesthetic career of our DREAMS

Ok Ok... But how do I find a mentor...

The Old Way

(The Hope and Pray Method)

1. Submit tons of applications for jobs you aren't qualified for...**Hope and Pray**
2. You take a low paying, less than satisfying job as a laser tech in a med spa with a promise that they will eventually train you in injecting and move you up....**Hope and Pray**
3. Follow Aesthetic Super Stars on Instagram and Tik Tok, watch hours and hours of videos, trainings, like, follow and ask questions. Engage with them and other followers in hopes of building a network that may ultimately get you into the industry...**Hope and Pray**
4. Take several weekend courses, spend thousands of dollars and countless hours, attempt to network with others there, be super excited that this will be your in, convince a friend or family member to be your model, Leave there less than confident...**Hope and Pray**
5. Perpetually remain in a dependent position of hoping and praying someone will see your passion and ambition and take a chance on you, mentor you, hire you and invest in you....**Hope and Pray**
